

Commercial Applicator Re-certification - Pesticides

Commercial licenses are only valid for the balance of the year in which the license was obtained plus 24 months and expire on January 31st.

To re-certify in order to maintain your license from the Wyoming Department of Agriculture, one of the following requirements must be met:

- 24 hours of pesticide related courses or workshop credits obtained during the time in which the license is valid. These credit hours must be validated with an agenda and proof of attendance. The Department determines if the coursework applies toward re-certification.
- Attendance at the Commercial Applicator Re-certification School held during January in Casper of each year.
- Re-take the exams for the categories in which you want to be re-certified.

Please contact Hank Uhden at 307.777.6574, if you have any questions.
